# ***HOW TO TRADE STOCKS USING THE RELATIVE STRENGTH INDEX (RSI)***

**IKE**

Trader & Presenter

**AL LOSADA**

Trader & Presenter

Turn off all distractions.

Reason

**01**

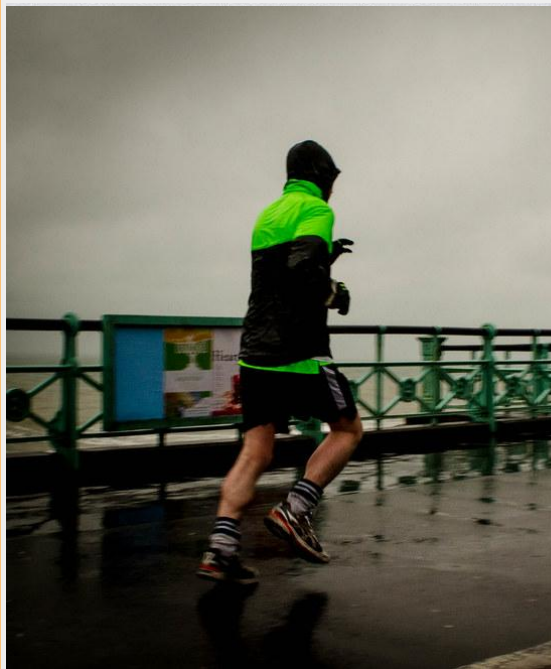

You are interested in learning new strategies that will take your trading performance to the next level so you can finally leave the 9-5 career behind.

Reason

02

You've seen, heard about, read about others making money trading, and you know you can do it too but you're just not seeing your account grow fast enough based on your goals.

Reason

03

You've tried different trading strategies that you thought, "okay, this is it", only to discover it's just not getting you to that place of consistent trading results.

# 1: Interested in learning new strategies

# 2: Desire to see your account grow month after month

# 3: Find the right strategy that provides consistent trading results

# The RSI Trading System

Developed by Larry Conner

Focuses on **QUALITY** stocks in a long term uptrends, but experiencing short term corrections

## ▶ RSI Chart Setup

- Focuses on quality stocks in long term up trends but are experiencing short term corrections

## ▶ Our Strategies (Long Term)

- ❑ **Portfolio Builder (Long Term) 7%**
  - ❑ Find great companies with consistent EPS and powerful growth trends. You may find a few dividend stocks here as well, but the main goal is growth. If you're looking for reliable upward trends, this is the place to start
- ❑ **Dividend Portfolio (Long Term) 46%**
  - ❑ Build your portfolio with dividend stocks that have been paying out more and more over time. Generate more income from your investments with reliable dividends from some best kept secrets.

## ▶ Our Strategies (Short Term)

- ❑ **Wheel Strategy - Long Term: \$690, Short Term: \$2,101**
  - ❑ These are long term and short term cash secured puts that generate income monthly. Our goal is to avoid assignment by rolling the trade for additional credit. If assigned, we use Covered Calls that allows us to generate additional income.
- ❑ **Small Cap - .30%**
  - ❑ High-potential, low-cost growth stocks mostly under \$20 that have EPS growing for 4 quarters or more. There may be more than one portfolio at any given time, and they are actively managed
- ❑ **RSI Indicator Trade - 6%**
  - ❑ We use the Relative Strength Index (RSI) along with high quality stocks with long term uptrends, and experiencing short term corrections. The strategy is similar to a swing trade where we capitalize on quick wins that can be traded on a daily basis.

Would you like to follow our trade/investment strategies while you learn from our five strategies I've outlined so you can be a consistently profitable trader?

# 1: Interested in learning new strategies

# 2: Maybe you're not seeing your account grow month after month

# 3: You haven't found the right strategy that provides consistent trading results

## ▶ Time to Break the Barriers!

Will you keep doing what you're doing and **hope** that one day something will stick?

Will you finally **take the steps** that will get you to the place you want to be and **THAT WORKS!**

Discipline  
Commitment

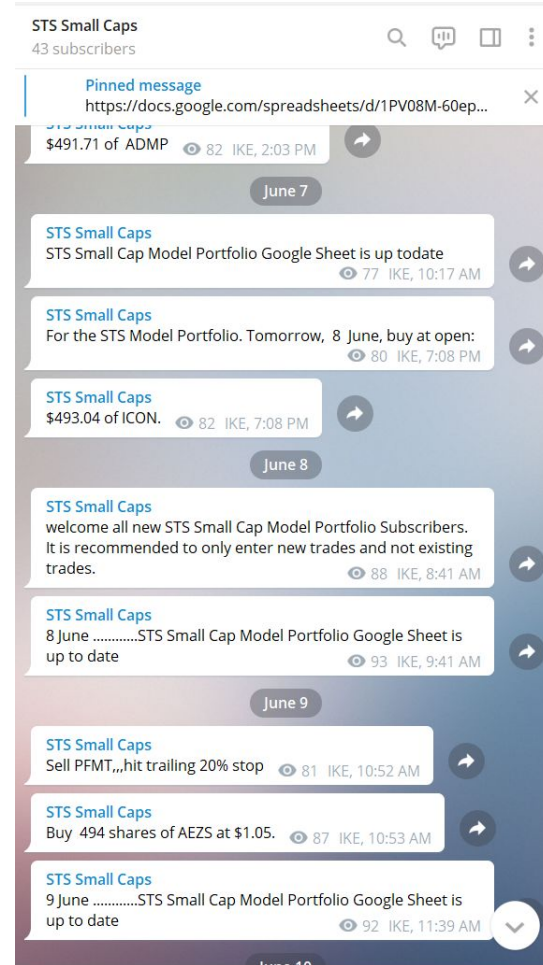

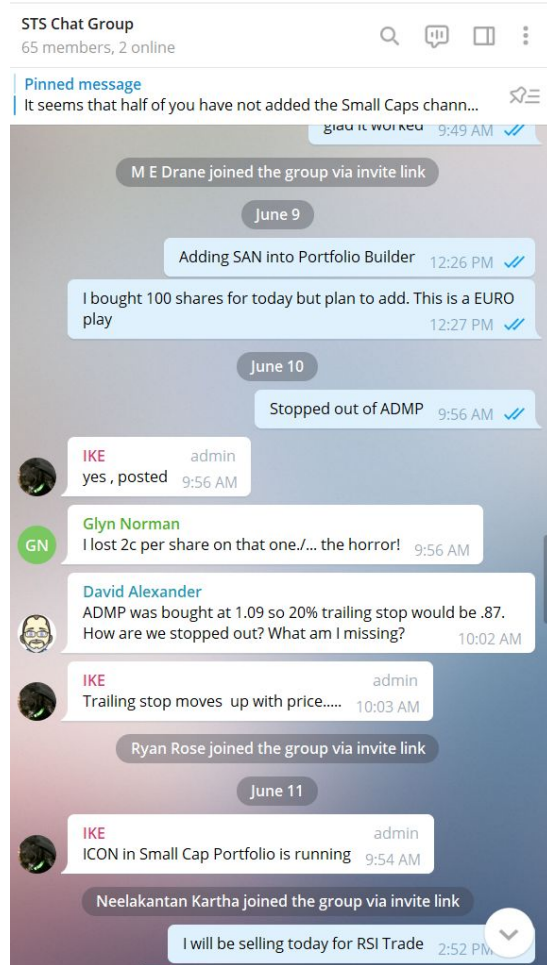

Having an Edge  
No Quit Attitude

SUCCESS
